

## The hinge-deficient human lactoferrin-Fc fusion protein which increased blood stability as a potential therapeutic agent

Purpose of Raising funds and/or collaboration

### Target disease

- Autoimmune disease (Autoimmune hepatitis, Systemic lupus erythematosus, rheumatoid arthritis)
- Tumor (NSCLC, anti-tumor drug-induced pain)
- Infection (sepsis)
- Vasculitis (Acute kidney injury, rhabdomyolysis, ANCA-associated vasculitis, Disseminated intravascular coagulation)

### Drug design

### Blood stability
