M Bio Technology Inc. is world leading company focused on the discovery and development of innovative therapeutic strategy for MID (Mycoplasma Infectious Diseases), based on our pioneering technology.

MID Spectrum™

- MID is a major cause of pneumonia, and asthma, COPD, fibrosis, and further, autoimmune disease, collagen disease, incredible immune disease, allergic disease, also stroke.
- MID is a cause of mental health, infectious diseases such as tuberculosis, interstitial pneumonia, chronic disease, which are closely related to public health and healthy industry and ecosystem.
- Most of these diseases are not recognized and untreated because of concept misunderstood, unreliable diagnostics and treatment resistance.

- We are offering Precision Preventative Medicine (ME-BYO Medicine) for MID based on our innovative solution: diagnostics (MID Prism™), therapeutics (MID Medicine™, MID Antibodies™) including vaccines (MID Vaccines™) based on the platform technology (MID Platform™) and networking system (MID Navigator™).
- We are seeking for partner to create global medical network for MID with various players, as an open innovation, including mental-health and health management. Also, we would like to spread the recognition that MID should be controlled as a national defense/national policy but also global problem.
