Nastent[®] classic is a tube-shaped medical device that is inserted from the nose. The inserted tube aids breathing by preventing the obstruction of the airway which causes poor sleep, frequent awakening during sleep and snoring. It paves the way to an innovative treatment against snoring and mild to moderate sleep apnea while limiting as much as possible the constraints.

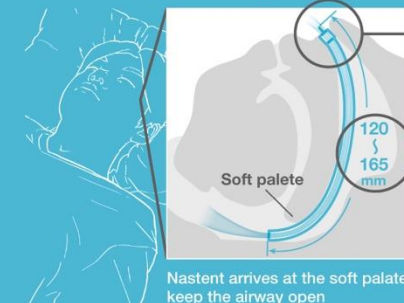

naStent[®] classic

7 different lengths from 120 to 165 mm

Snoring and Sleep Apnea Treatment Device developed with Medical Specialists.

The surprising secret to restful nights

Insertion image of the Nastent

fix it with a nose clipper well

120 ~ 165 mm
 10 different lengths to adapt to your morphology

Soft palate

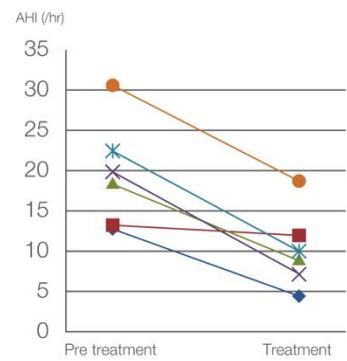

Nastent arrives at the soft palate, keep the airway open
