

Company

Japanese Organization for Medical Device Development, Inc.

Presenter

Taiki Ishikura

Here is an explanation of your project. Please make shortly and directly.

Medical Innovation to the World

Medical device incubator

(Research and development of medical devices, manufacturing and sales of medical devices)
Many Japanese medical innovations will grow up from our company for the new health care.

Development / Investment Portfolio

Sizer set for use in aortic valve reconstruction (aortic valvuloplasty)

Japan's first abdominal aortic aneurysm stent graft system

Robot technology utilizing high precision / real-time biosignal processing algorithms

Innovative, high-resolution ophthalmology OCT camera

The world's first non-invasive pain therapy device using special magnetic field irradiation

high speed/sensitivity cell/bacteria analysis technologies utilizing machine learning systems
