

Company

Bayer - CoLaborator Kobe -

Presenter

**Chi
Tianhua**

“CoLaborator Kobe” is a Bayer’s unique incubator located in Kobe Biomedical Innovation Cluster, and Bayer contributes to fostering a venture ecosystem with relevant communities.

**CoLaborator
Kobe**

What we offer...

- // Space of **lab and office**
- // Access to our **pharm expertise**
- // Various **networking** opportunities

Our tenant

Epigeneron, Inc.

Epigeneron is a bio-venture launched from Osaka University and the first tenant at CoLaborator Kobe. This company strives to develop practical technologies for drug discovery target identification, and therapies for intractable diseases such as cancer and central nervous system diseases caused by abnormal gene expression.

Myoridge Co. Ltd.

Myoridge is a bio-venture from Kyoto University. Myoridge endeavors to support the solution of challenges in new drug development by providing drug discovery support tools that lower cost through the use of iPS cell-derived cardiomyocytes based on a protein-free method of inducing myocardial differentiation.

We are looking for companies whose technology platforms, drug targets or drug candidates may align with Bayer's own research.
